I am a full-stack developer with one year of experience in turning ideas into functional applications. From building sleek interfaces to optimizing databases, I have demonstrated my ability to handle both frontend and backend tasks. My passion for coding and focus on efficient solutions allow me to deliver products that not only work well but also exceed expectations.

PROFESSIONAL EXPERIENCE

Gran Oferta Cumana

Gestor y Líder Operativo

Cuamana, Venezuela

July 2023 – June 2024

- Responsible for maintaining the billing system, based on SQL and C++, ensuring smooth and error-free transaction processing. My technical intervention included troubleshooting and optimizing the system to ensure its reliability.
- Led a small team, demonstrating leadership skills by coordinating staff tasks and fostering a collaborative work environment. My focus on continuous improvement resulted in a more cohesive team and superior performance.
- Implemented strategies for efficient inventory management, improving accuracy of control and reducing discrepancies. This approach contributed to better product availability and increased customer satisfaction.

EDUCATION

UNIVERSIDAD SANTA MARIA

Systems Engineering

Honors: High Distinction in Programming and Final Project

Lecheria, Venezuela

March 2020 – Present

ADDITIONAL SKILLS

- **Algorithm Creator with Coffee in Hand:** My passion for coding is as great as my love for coffee. While others see lines of text, I see opportunities to innovate and design solutions that make a difference.
- Native in Spanish. Fluent in English.
