I am a full-stack developer passionate about transforming ideas into functional applications. From building elegant interfaces to optimizing databases, I have demonstrated my ability to handle both frontend and backend development. My focus on efficient, results-oriented solutions ensures products that not only meet but exceed expectations.

PROFESSIONAL EXPERIENCE

EMCA Academy

FullStack Developer and Technical Consultant

Barcelona, Venezuela

March 2024 - October 2024

- I designed and developed a complete billing system for the EMCA academy, using Node.js, pdfkit, Electron, and React, with a comprehensive focus on TypeScript. From initial design to deployment, the project automated the generation of PDF invoices, optimized data management with Supabase and PostgreSQL, and improved the user experience with a functional interface.
- The system included prorated calculations, automatic reminders, and security measures, meeting the institution's key needs and increasing operational efficiency.

EDUCATION

SANTA MARIA UNIVERSITY

Systems Engineering

Barcelona, Venezuela

March 2020

December 2024

CLOSDOSBALDO RUSSIAN UNIVERSITY

Computer Engineering

Cumana, Venezuela

March 2024

At present

ADDITIONAL SKILLS

- Native Spanish speaker. Fluent in English.
